Product Overview

Bepotis Eye Drops

- ♦ Active ingredient: Bepotastine Besilate 15 mg
- ♦ Dual-action: **Antihistamine + Mast Cell Stabilizer**
- ♦ Rapid onset within minutes & sustained relief up to 12 hours
- ♦ Provides relief from itching, redness, tearing & allergic symptoms
- ♦ Non-sedating, topical ocular anti-allergic solution

Why Bepotastine?

Dual Mechanism of Action

Blocks H1 receptors → rapid relief from itching & redness

Stabilizes mast cells → prevents future histamine release

Immediate & Long-term Control

Offers **both immediate & long-term control** of allergic conjunctivitis

Superior Tolerability

Superior tolerability & patient comfort

Indications

Bepotis is recommended for

Seasonal allergic conjunctivitis

Effective relief during pollen seasons and environmental allergen exposure

Perennial allergic conjunctivitis

Year-round protection for chronic allergy sufferers

Relief from ocular itching, redness & watering

Addresses the most common and uncomfortable symptoms

Patients with recurrent/long-term allergic eye disease

Ideal for those requiring consistent, reliable treatment
