Product Overview

Composition

Moxifloxacin + Ketorolac Tromethamine

Formulation

Broad-spectrum fluoroquinolone antibiotic + potent NSAID

Action

Combats bacterial infections while reducing pain and inflammation

Benefits

Fast-acting ocular comfort post-surgery or injury

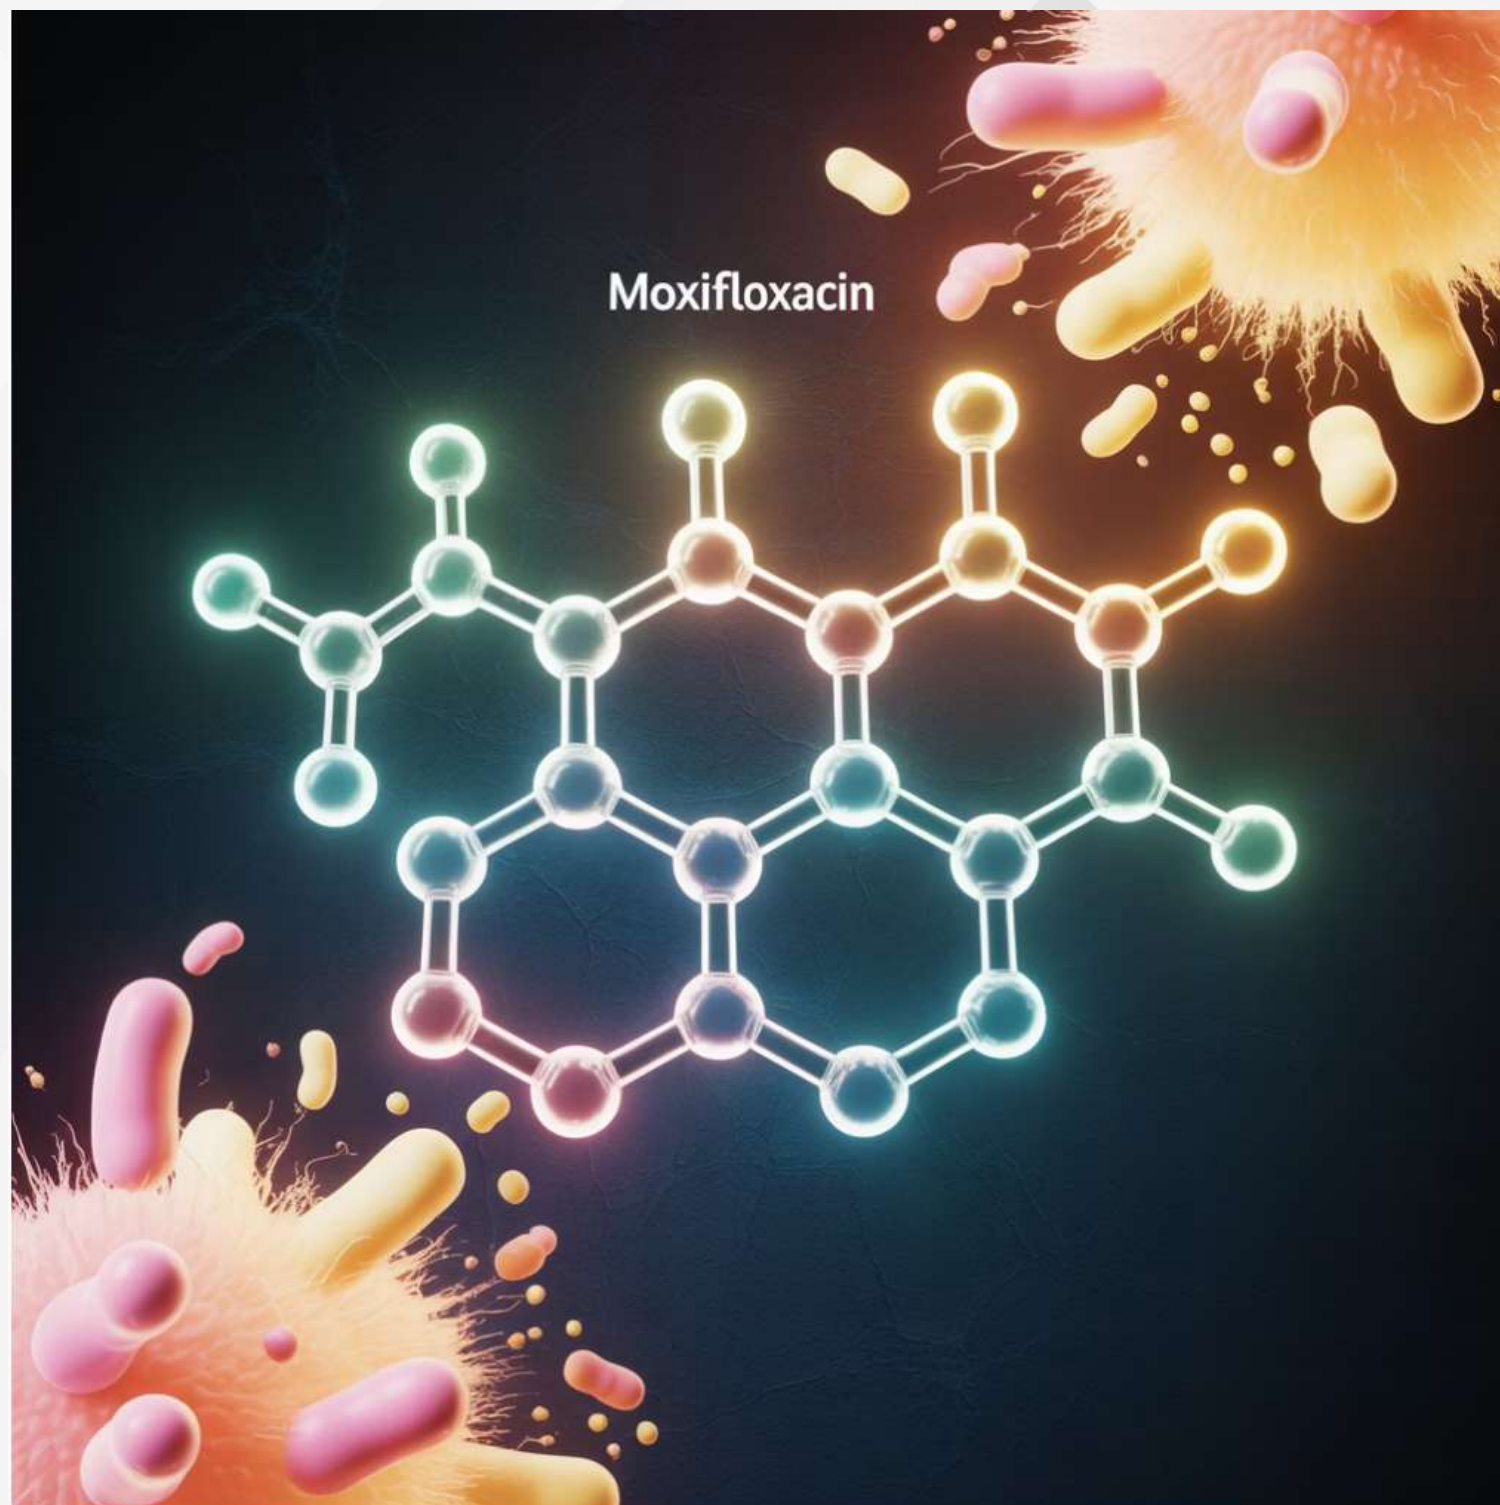

Protection

Prevents post-operative complications and promotes healing

Why Moxifloxacin + Ketorolac?

Moxifloxacin (4th Gen Fluoroquinolone):

- Broad antibacterial coverage
- Rapid bactericidal action
- Excellent ocular tissue penetration

Ketorolac Tromethamine (NSAID):

- Reduces ocular pain, redness, and swelling
- Non-steroidal → no steroid-related side effects
- Enhances patient comfort after surgery or trauma

 Dual therapy = Infection control + Rapid pain & inflammation relief

Indications

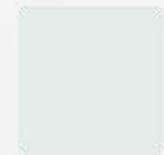

Moxytrip-KT is recommended for:

Post-cataract and post-LASIK surgery prophylaxis

Bacterial conjunctivitis with inflammation

Ocular pain, photophobia, or irritation after eye procedures

Post-trauma ocular inflammation management

Prevention of secondary complications in high-risk patients

Clinical Advantages

★ Key Benefits of Moxytrop-KT:

Broad-spectrum antibacterial protection

Effective against a wide range of ocular pathogens

Fast-acting anti-inflammatory & analgesic effect

Provides quick relief from discomfort

Reduces redness, swelling, and ocular discomfort

Improves patient experience and quality of life

Improves healing and patient satisfaction

Leads to better clinical outcomes

Non-steroidal → safer for patients at risk of steroid complications

Avoids steroid-related adverse effects

Comparison with Other Combinations

Parameter	Moxytrip-KT (Moxi + Ketorolac)	Moxi + Steroid	Tobramycin + NSAID
Antibacterial Coverage	✓ Broad (4th Gen)	✓ Broad	⚠ Moderate
Anti-inflammatory	✓ Rapid, NSAID	✓ Strong (Steroid)	⚠ Moderate
Pain Relief	✓ Excellent	⚠ Moderate	✓ Good
Post-Surgery Use	✓ Preferred	✓ Preferred	⚠ Limited
