Product Overview

Moxifloxacin HCl

4th Generation Fluoroquinolone
Antibiotic

Dexamethasone

Potent Corticosteroid Anti-inflammatory

Synergistic Action

Controls both **infection & inflammation**

Broad-Spectrum Coverage

With rapid symptom relief

Sterile Formulation

Ophthalmic solution for topical use

Why This Combination?

Moxifloxacin

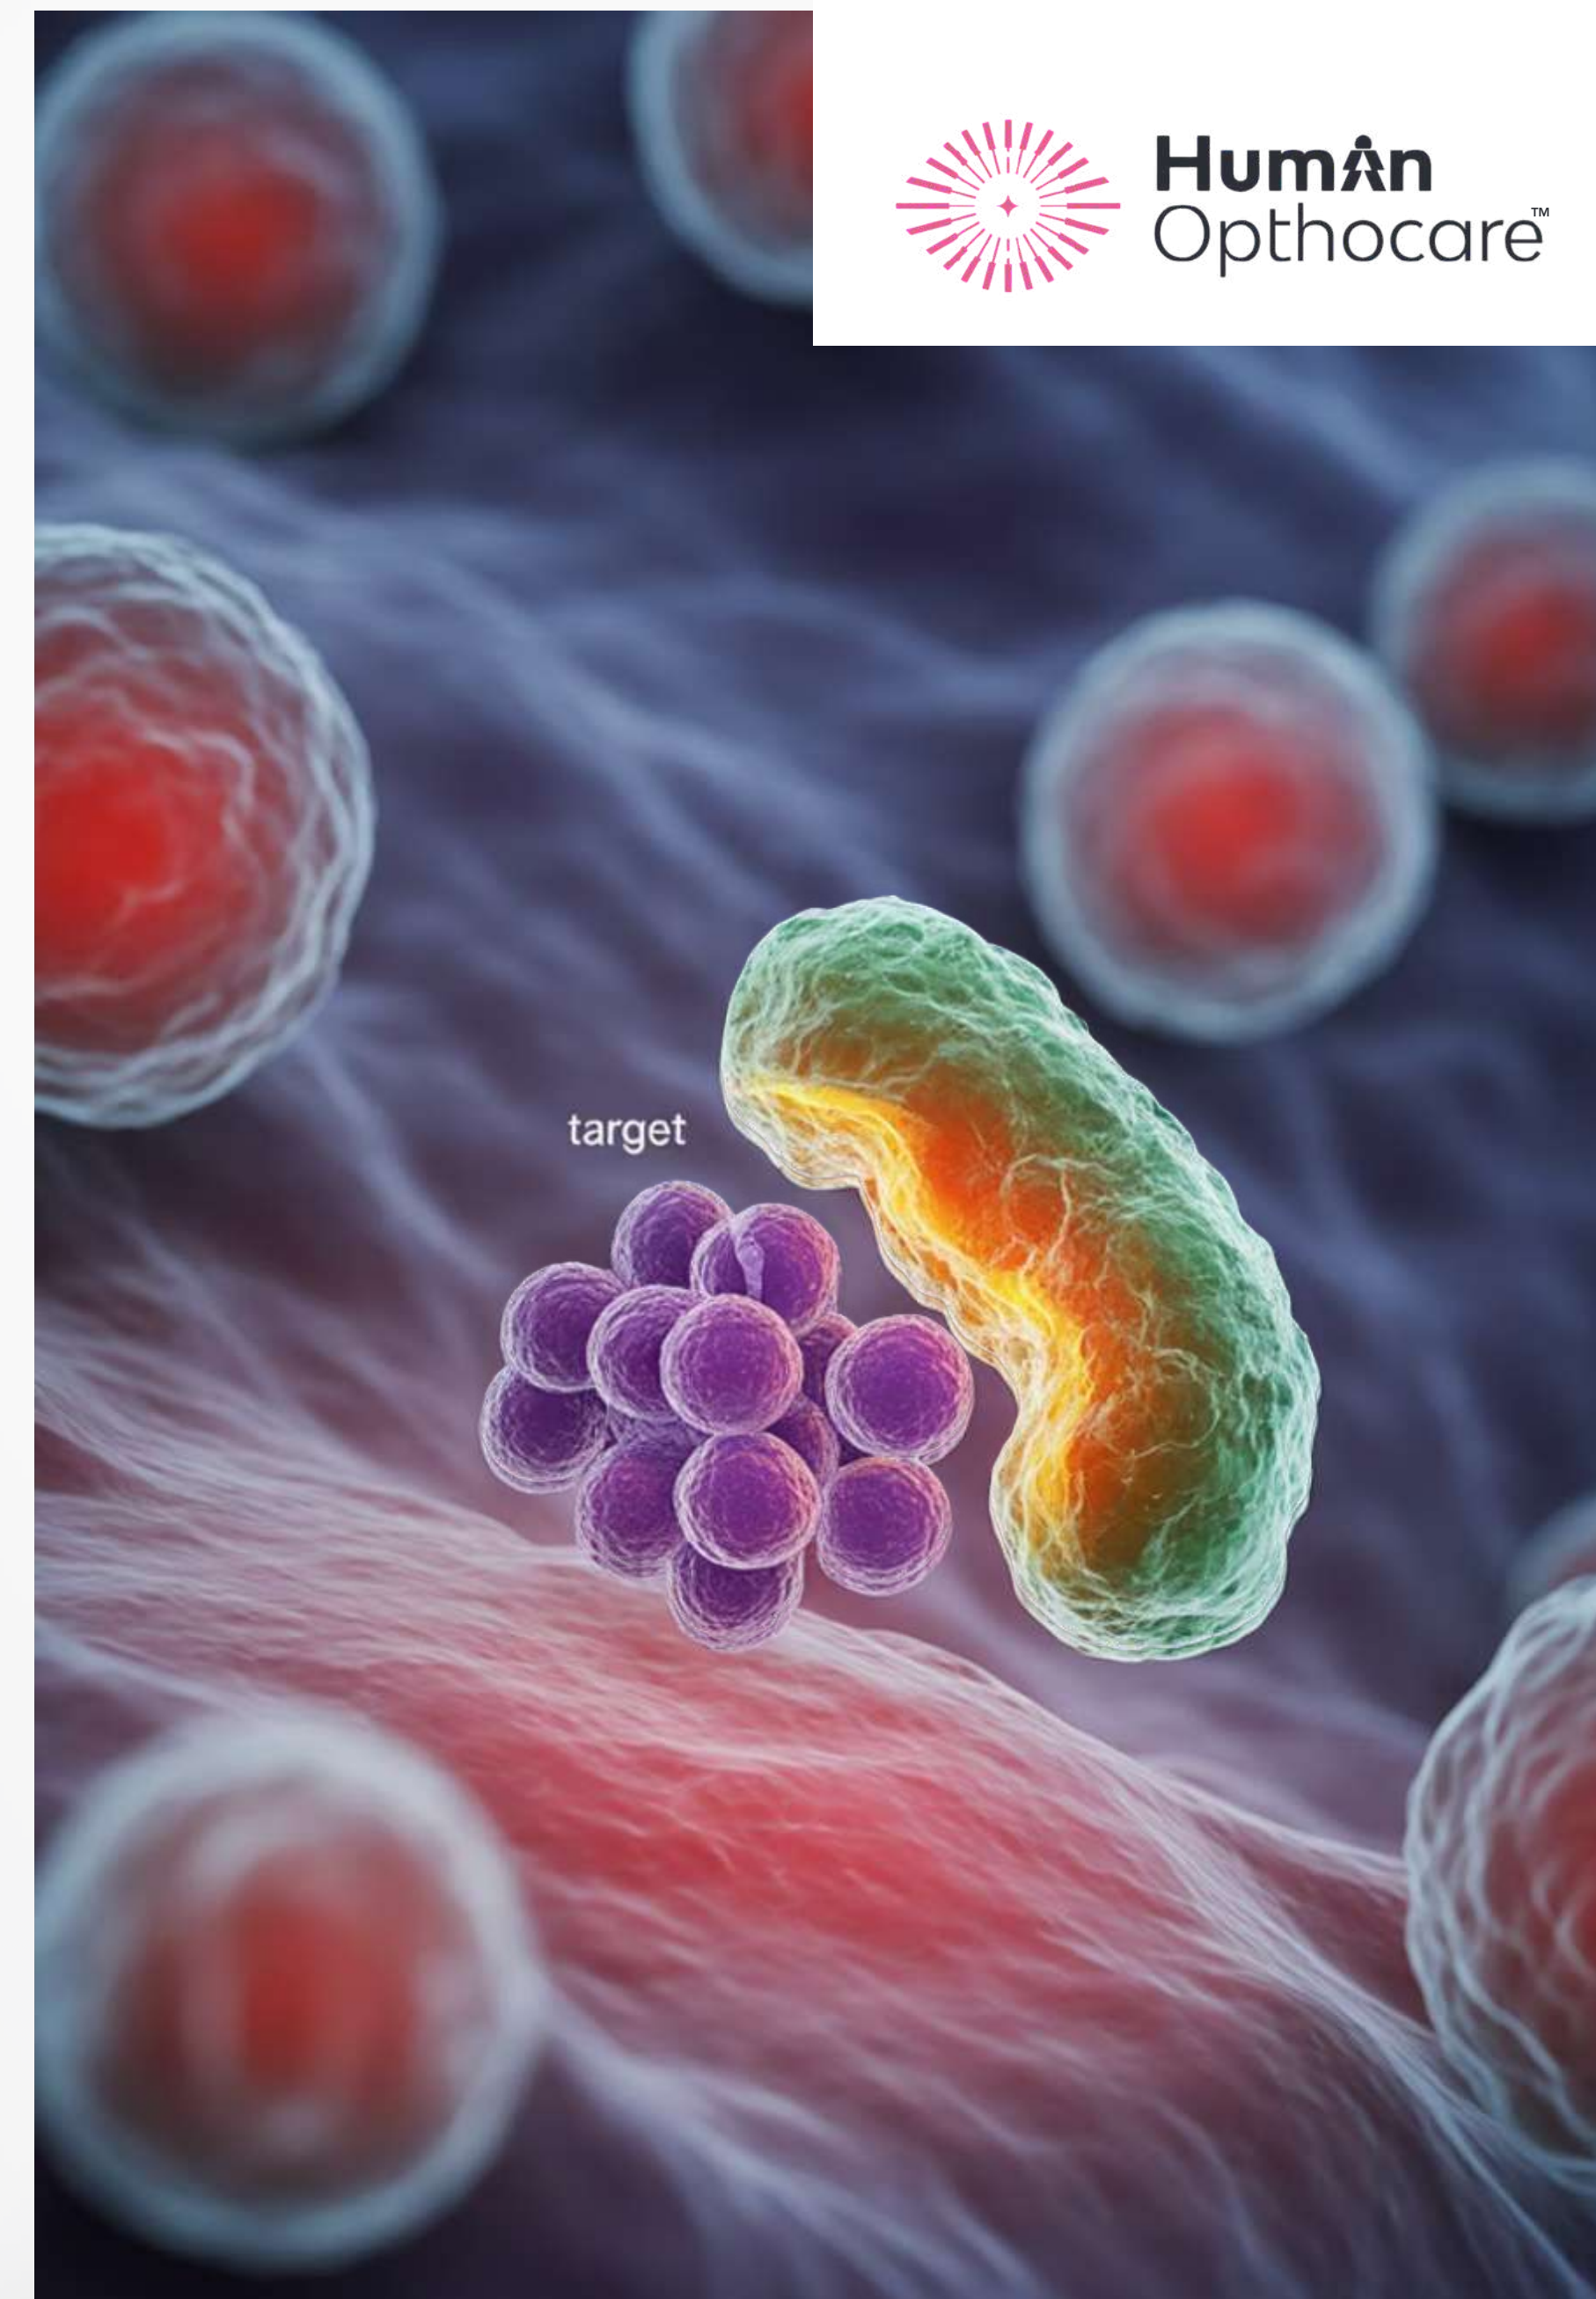

-  Inhibits bacterial DNA gyrase & topoisomerase IV → broad spectrum bactericidal
- ✓ Effective against Gram+ & Gram- pathogens, including resistant strains

Dexamethasone

-  Potent corticosteroid suppresses inflammatory mediators
-  Rapid relief from swelling, redness & discomfort

Result:

Superior infection control + faster inflammation resolution

Indications

- **Post-operative ocular infections with inflammation**
Especially after cataract surgery
- **Bacterial conjunctivitis with associated inflammation**
- **Prophylaxis & management of ocular surface infections post-surgery**
- **Inflammatory conditions of anterior segment**
Where bacterial risk exists

MOXYTRIP-DX is recommended for:

Clinical Advantages

☀️ Key Benefits of MOXYTRIP-DX:

Dual Therapy

Antibacterial + anti-inflammatory in one drop

Broad-Spectrum Coverage

Effective against wide range of bacteria

Faster Recovery

Reduced pain, redness & swelling

Decreased Risk

Fewer post-surgical complications

Improved Compliance

Single-combination therapy simplifies treatment

Comparison vs Monotherapy

Parameter	MOXYTRIP-DX (Combo)	Antibiotic Alone	Steroid Alone
Infection Control	✓ Strong	✓ Strong	✗ None
Inflammation Relief	✓ Potent	✗ None	✓ Strong
Patient Compliance	✓ High (1 drop)	⚠ Moderate	⚠ Moderate
Post-Surgical Recovery	✓ Faster	⚠ Delayed	⚠ Incomplete

Dosage & Administration

Dosage:

- 1–2 drops in the affected eye(s), **3–4 times daily**
- Adjust dosage per physician's recommendation
- Shake well before use

- ⚠ ⚠ Not for long-term unsupervised use (monitor for steroid-related effects)
- ⚠ Avoid contact lens wear during treatment

Safety & Tolerability

Well-Tolerated in Clinical Studies

Possible Side Effects

- Transient eye irritation or burning
- Raised intraocular pressure (with prolonged steroid use)
- Secondary fungal/viral infection (rare, long-term use)

Contraindicated In

- Viral, fungal, or tubercular ocular infections
- Hypersensitivity to fluoroquinolones or corticosteroids

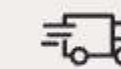

Why Prescribe MOXYTRIP-DX?

 **Doctor's Choice For:**

Post-operative Care

Infection prevention + inflammation control

Faster Recovery

Dual-action ensures **faster & more complete recovery**

Dual Efficacy

Broad-spectrum antibacterial + steroid efficacy

Better Compliance

Improves patient compliance with combination therapy

 **Trusted formulation from HumAn Opthocare**

Contact Us

Fluromac is a potent ophthalmic corticosteroid for targeted inflammation relief with a strong safety profile when used judiciously.

Use with clinical discretion, especially in high-risk ocular conditions.
