Product Overview

Active Ingredients:

- **Ofloxacin** → Broad-spectrum fluoroquinolone antibiotic
- **Dexamethasone** → Potent corticosteroid for anti-inflammatory action
- **Hydroxypropyl Methylcellulose (HPMC)** → Lubricant & tear substitute for comfort

Multi-action formulation:

Antibacterial + Anti-inflammatory +
Lubrication

Specially designed for:

Post-surgical prophylaxis, ocular
infections with inflammation & dry eye
discomfort

Why Ofzorix-D?

Triple Mechanism of Action

Ofloxacin

Rapid bactericidal effect on
gram+ & gram- bacteria

Dexamethasone

Reduces swelling, redness, pain
& post-surgical inflammation

HPMC

Provides soothing lubrication,
prevents dryness & irritation

★ **Advantage:** Single solution for infection, inflammation & ocular comfort

Indications

Post-cataract & LASIK surgery prophylaxis

Ocular infections with associated inflammation

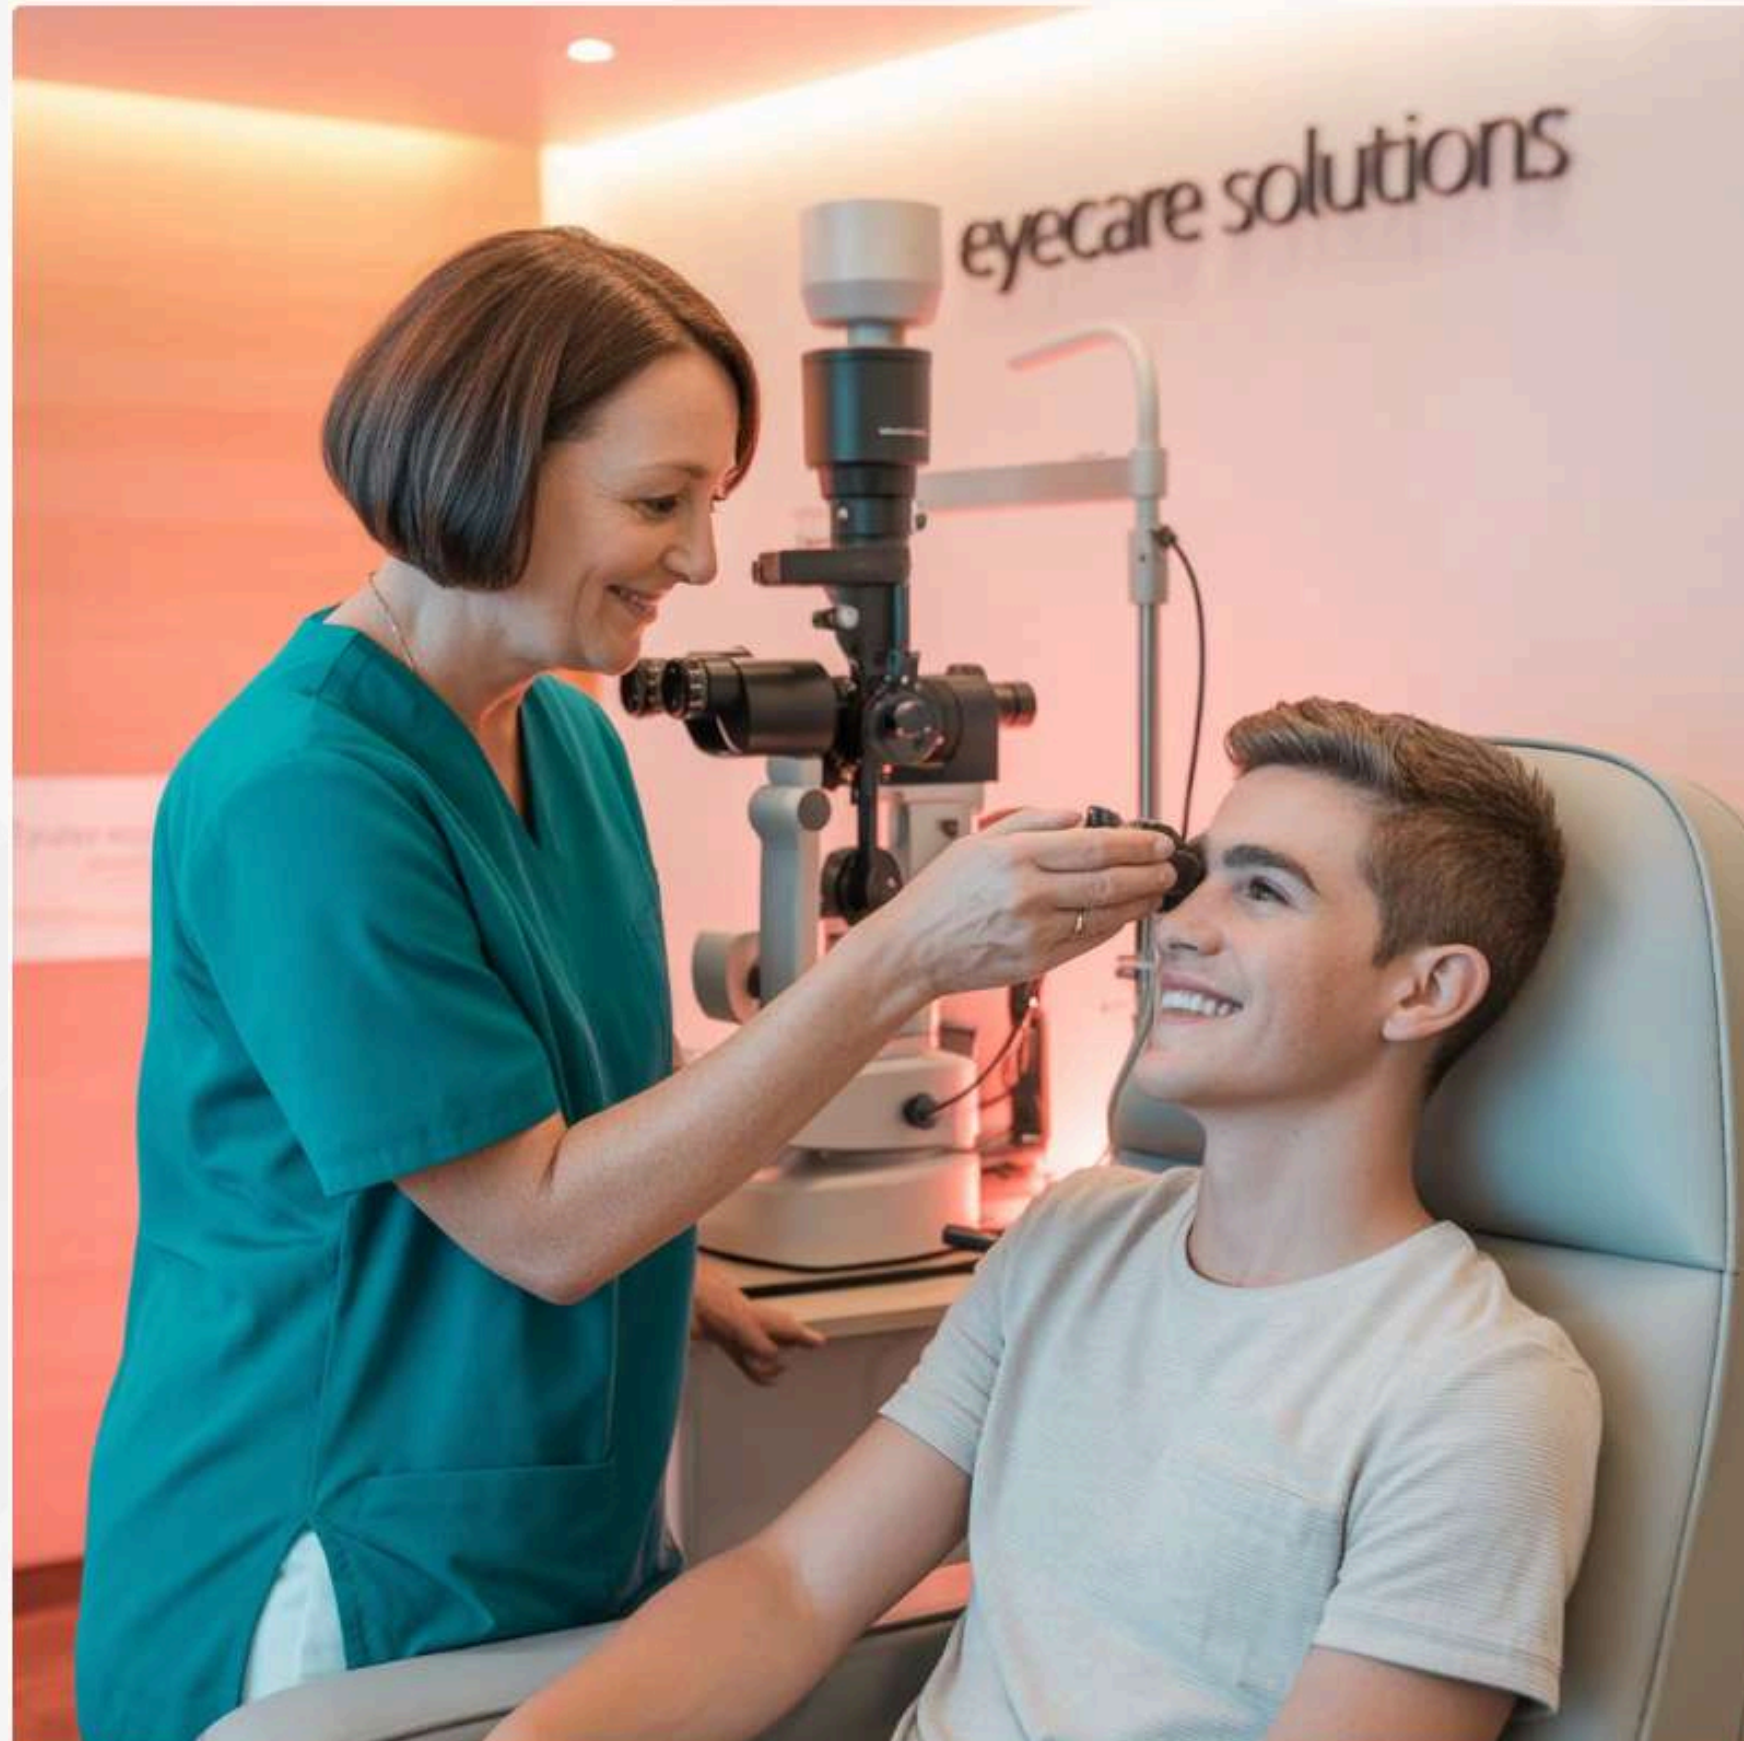

Steroid-responsive inflammatory ocular conditions with bacterial risk

Relief from ocular irritation, redness, dryness & discomfort

Ofzorix-D is recommended for the above conditions

Clinical Advantages

Key Benefits of Ofzorix-D:

Triple-action formulation (Antibiotic + Steroid + Lubricant)

Faster recovery in post-operative patients

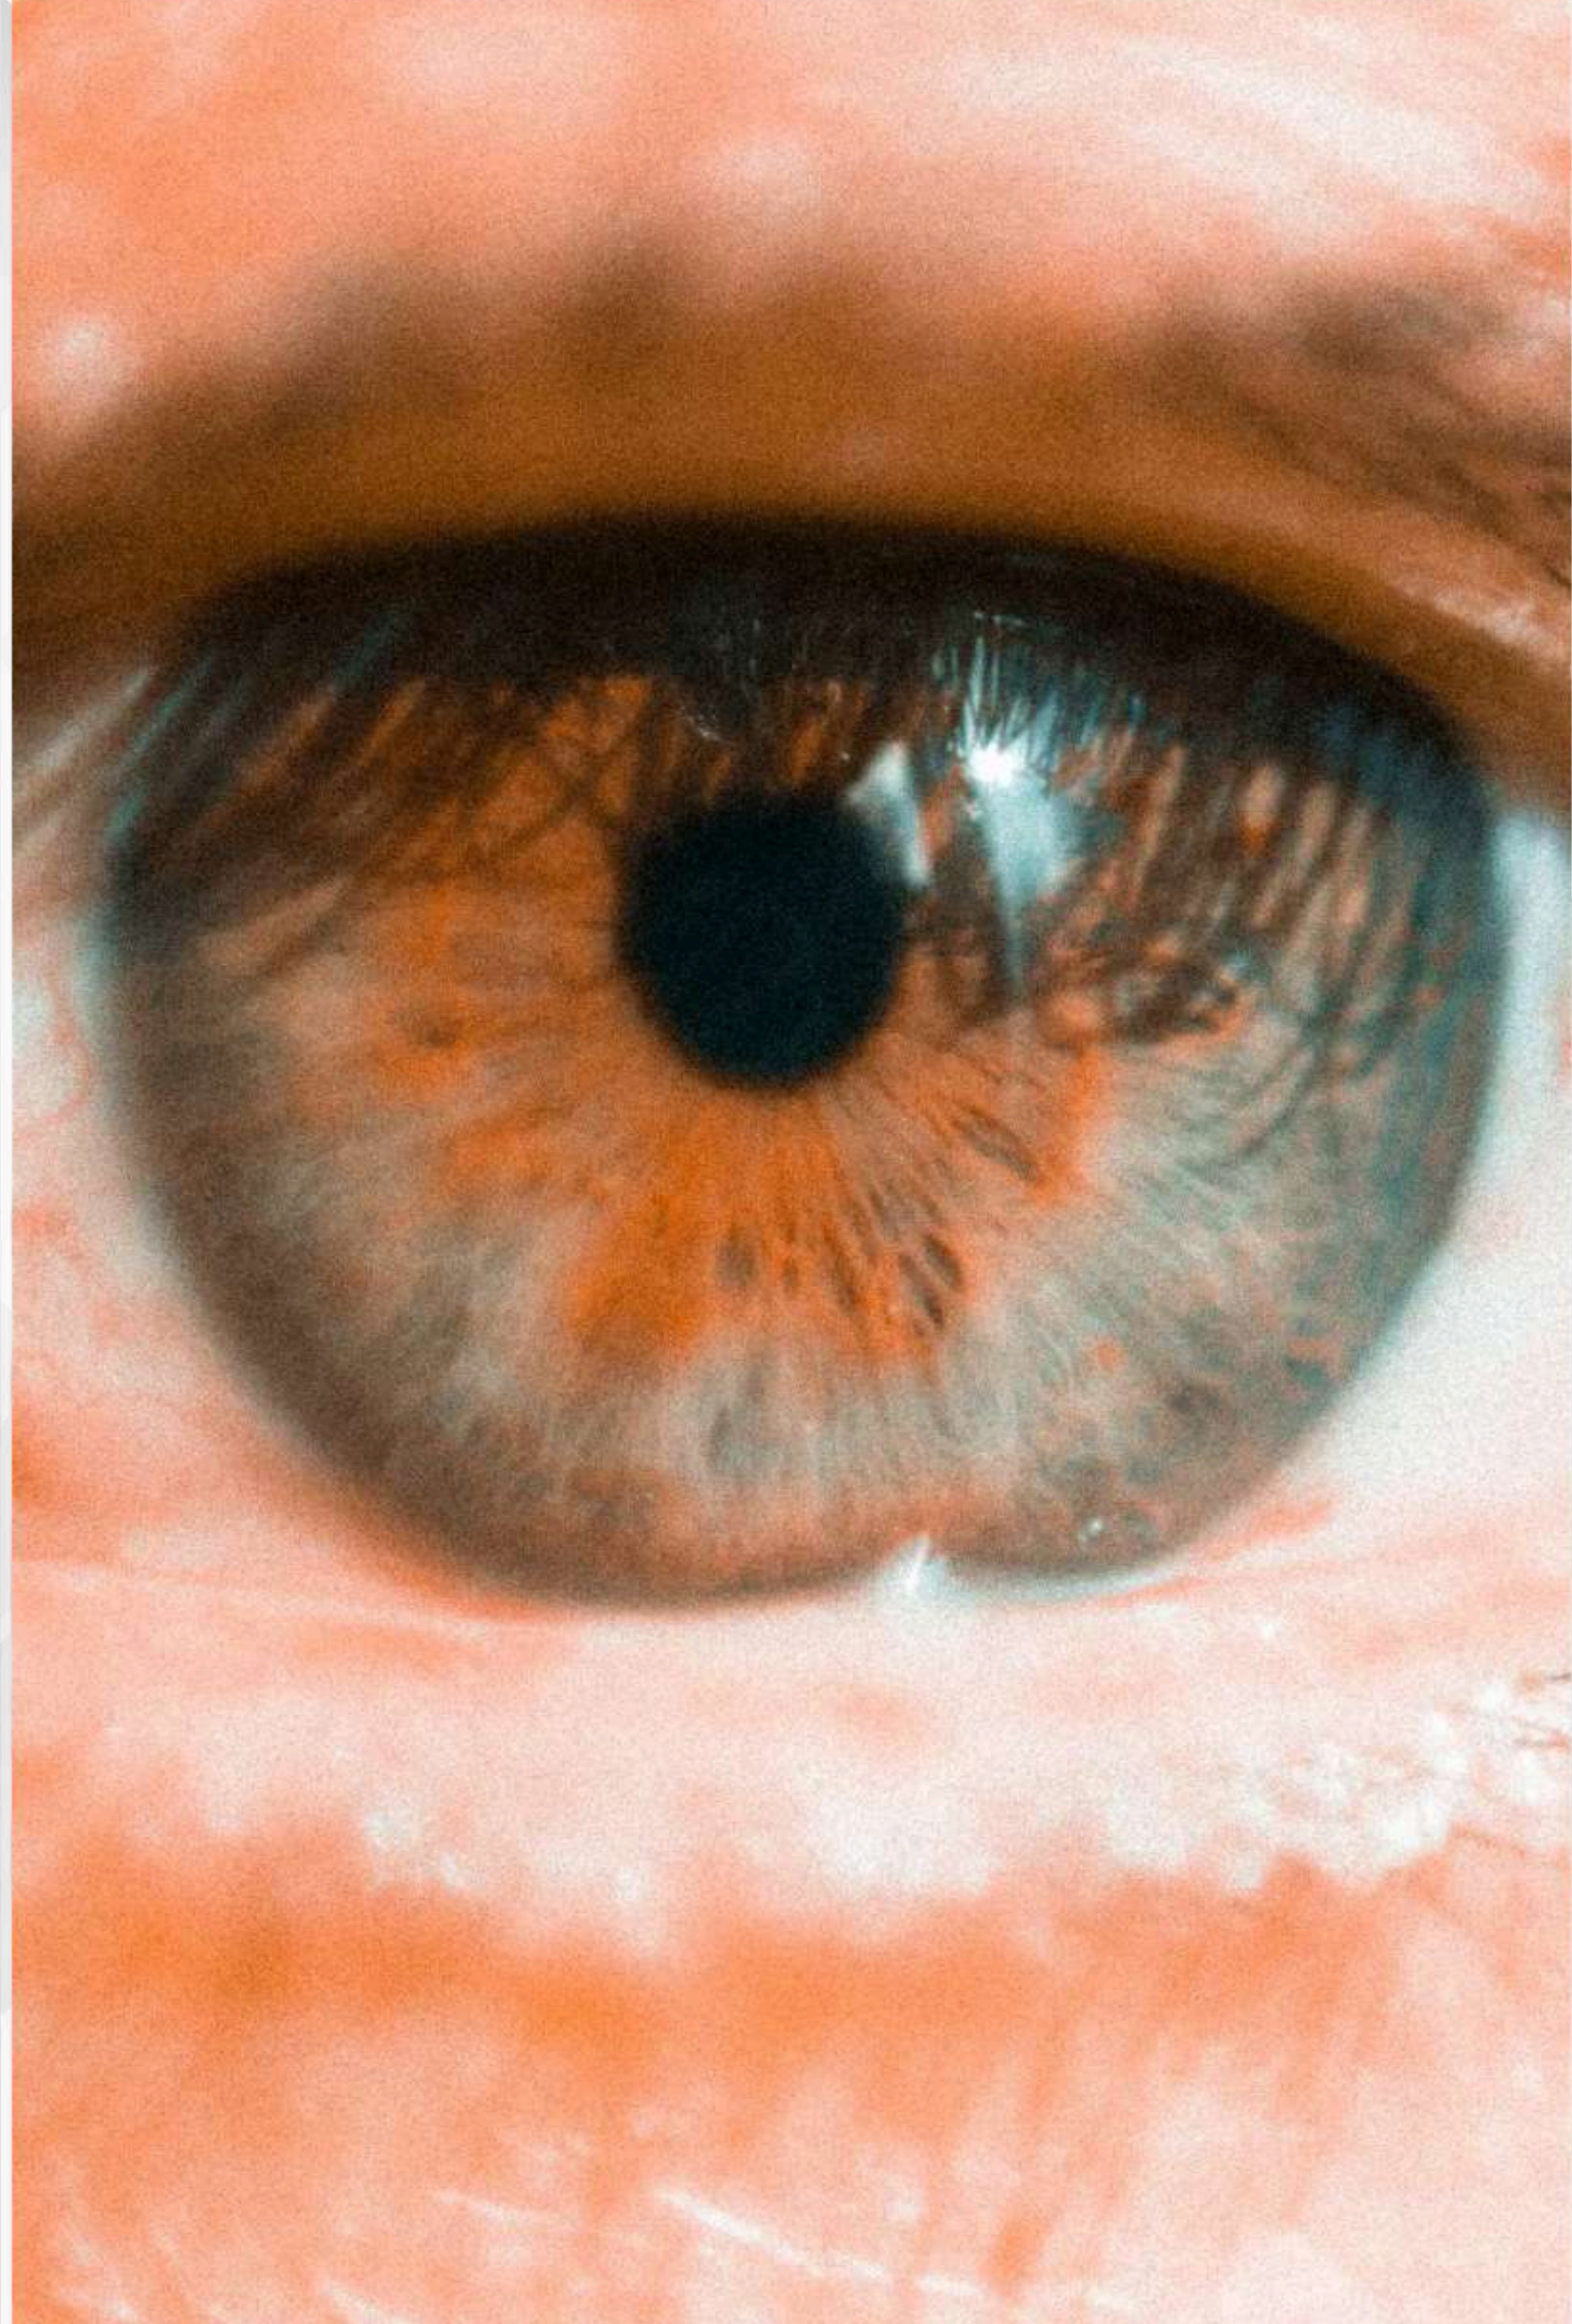

Reduces need for multiple eye drops → improves compliance

Provides soothing comfort during healing phase

Trusted safety profile with balanced formulation
