Product Overview

Loteprednol Etabonate

Corticosteroid ophthalmic suspension

Rapid Action

Rapid anti-inflammatory action with improved safety profile

Targeted Design

Designed for ocular surface & anterior segment inflammation

Effective Relief

Reduces redness, pain, and discomfort effectively

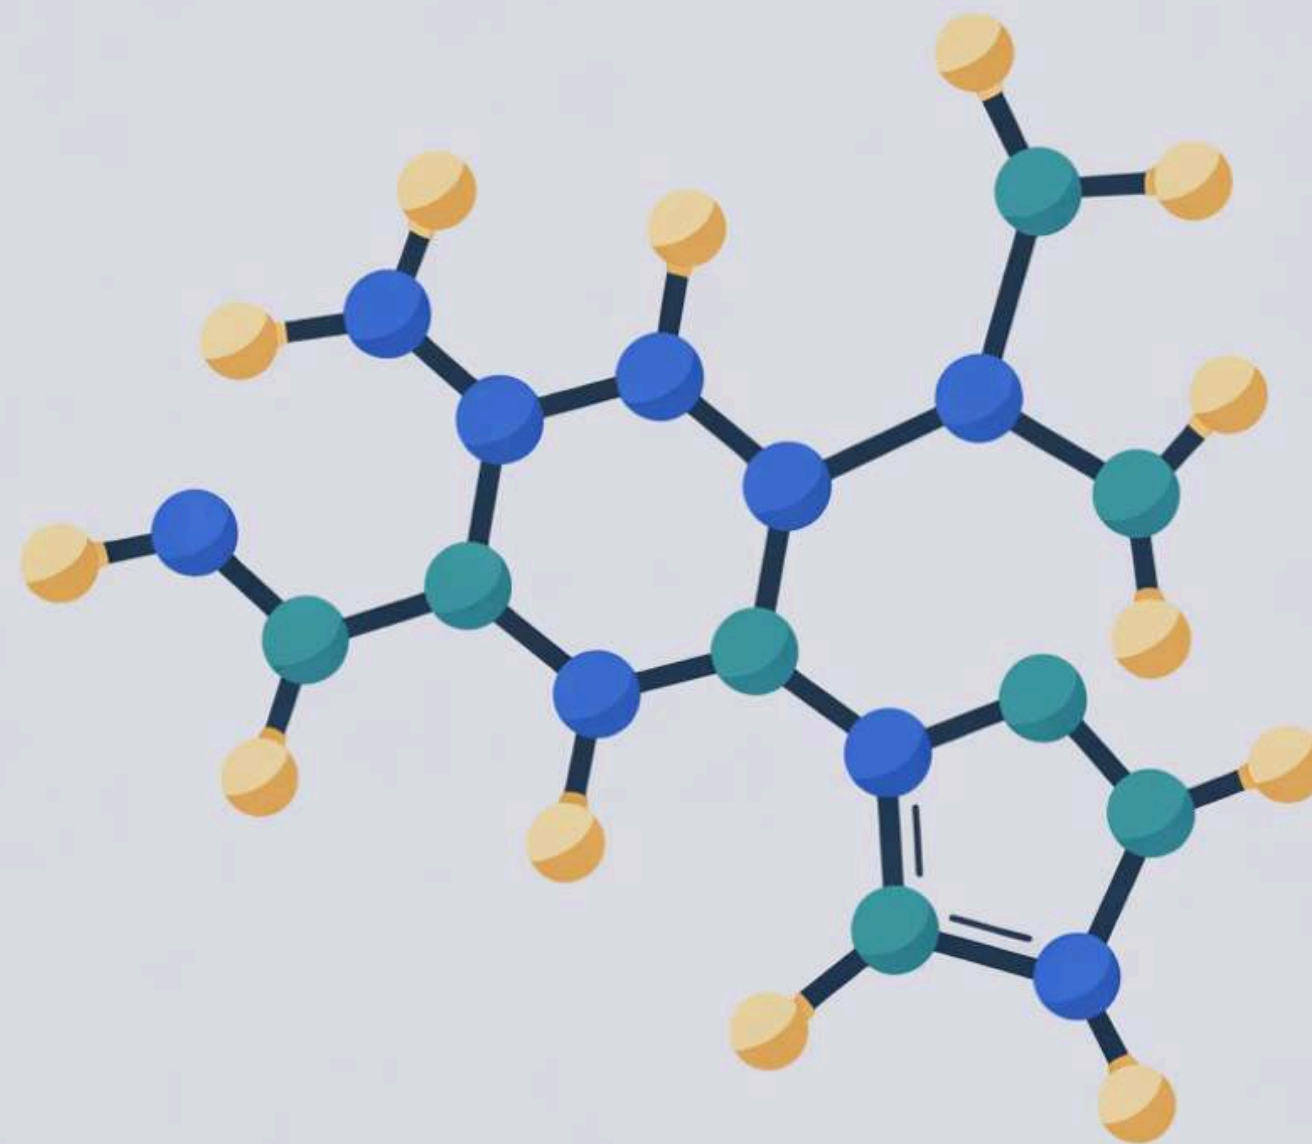

Suspension Formula

Suspension formulation for sustained ocular contact

Why Loteprednol?

Corticosteroid with Soft Drug Design

Loteprednol etabonate

-  Potent anti-inflammatory action via inhibition of phospholipase A2 pathway
-  Rapid metabolism → minimizes steroid side effects
-  Lower risk of intraocular pressure (IOP) rise compared to conventional steroids
-  Effective relief with improved safety margin

Indications

PREDLOT is recommended for:

Post-operative inflammation

Post-operative inflammation and pain following ocular surgery

Allergic conjunctivitis

Management of allergic conjunctivitis with inflammation

Uveitis

Uveitis and anterior segment inflammation

Chronic dry eye

Chronic dry eye with inflammatory component

Other conditions

Other steroid-responsive ocular inflammatory conditions

Clinical Advantages

Key Benefits of PREDLOT:

-  Strong anti-inflammatory action
-  Reduced risk of IOP elevation compared to traditional steroids
-  Faster symptom relief – pain, redness & swelling
-  Ideal for both short-term and long-term use under monitoring
-  Excellent tolerability profile

Comparison with Other Corticosteroids

Parameter	PREDLOT (Loteprednol)	Conventional Corticosteroids
IOP Elevation	✓ Very Low Risk	✗ Higher Risk
Cataract Formation	✓ Rare	✗ Possible
Anti-inflammatory Potency	✓ High	✓ High
Metabolism	✓ Rapid & Safe	✗ Slower
Patient Compliance	✓ Good	⚠ Variable

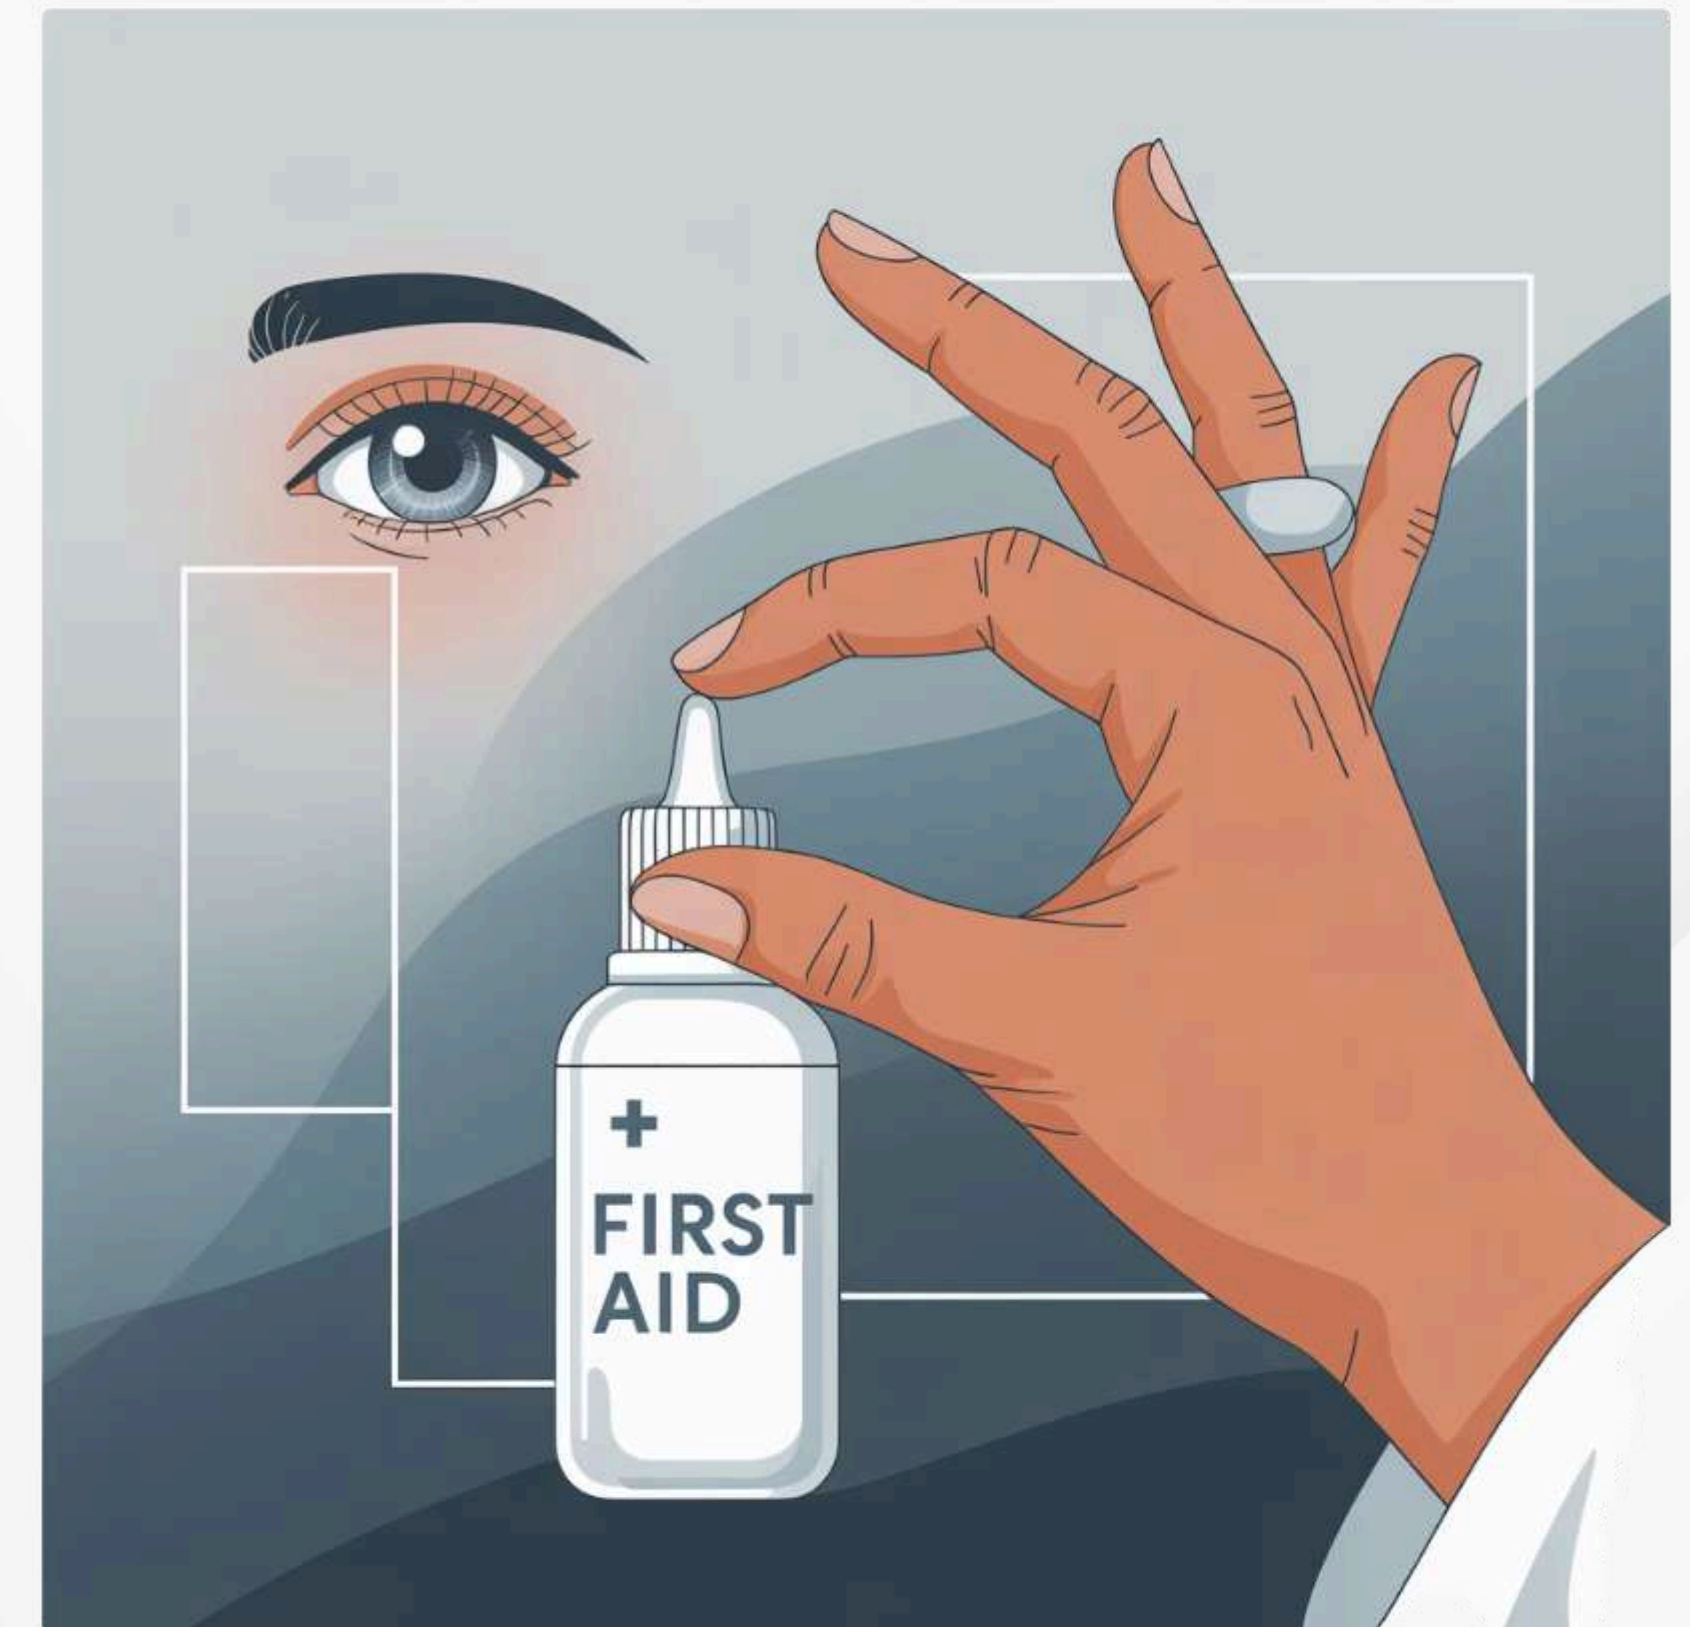

PREDLOT offers **superior safety profile** while maintaining high efficacy

Dosage & Administration

Dosage:

- 1–2 drops in the affected eye(s) **4 times daily**.
- Shake well before use.

- ⚠ ⚠ Dosage may be tapered by physician based on response
- ⚠ Not to be used while wearing contact lenses

Safety & Tolerability

Well-Tolerated with Low Side-Effect Profile

Possible but uncommon side effects:

- Mild eye irritation
- Transient blurred vision
- Rare chance of delayed wound healing

Contraindicated in:

- Viral, fungal, or tubercular eye infections
- Known hypersensitivity to corticosteroids

PREDLOT's **soft drug design** contributes to its excellent safety profile

Why Prescribe PREDLOT?

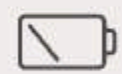

Doctor's Choice For:

Effective management of ocular inflammation

Corticosteroid efficacy with improved safety

Lower risk of IOP elevation & cataract vs conventional steroids

Trusted brand by HumAn Opthocare

Contact Us

Fluromac is a potent ophthalmic corticosteroid for targeted inflammation relief with a strong safety profile when used judiciously.

Use with clinical discretion, especially in high-risk ocular conditions.
