

PREDLOT-M EYE DROPS

Moxifloxacin & Lotepreanol Etabonate Ophthalmic Suspension

"Dual Power. Infection Control with Inflammation Relief."

Marketed by: Human Opthocare

A Division of Human Biolife India Pvt. Ltd.

www.humanopthocare.com

Product Overview

Active Ingredients:

- **Moxifloxacin** → Broad-spectrum 4th gen fluoroquinolone antibiotic
- **Lotepreanol Etabonate** → Potent corticosteroid with anti-inflammatory effect

Multi-action formulation:

Infection control + Inflammation relief

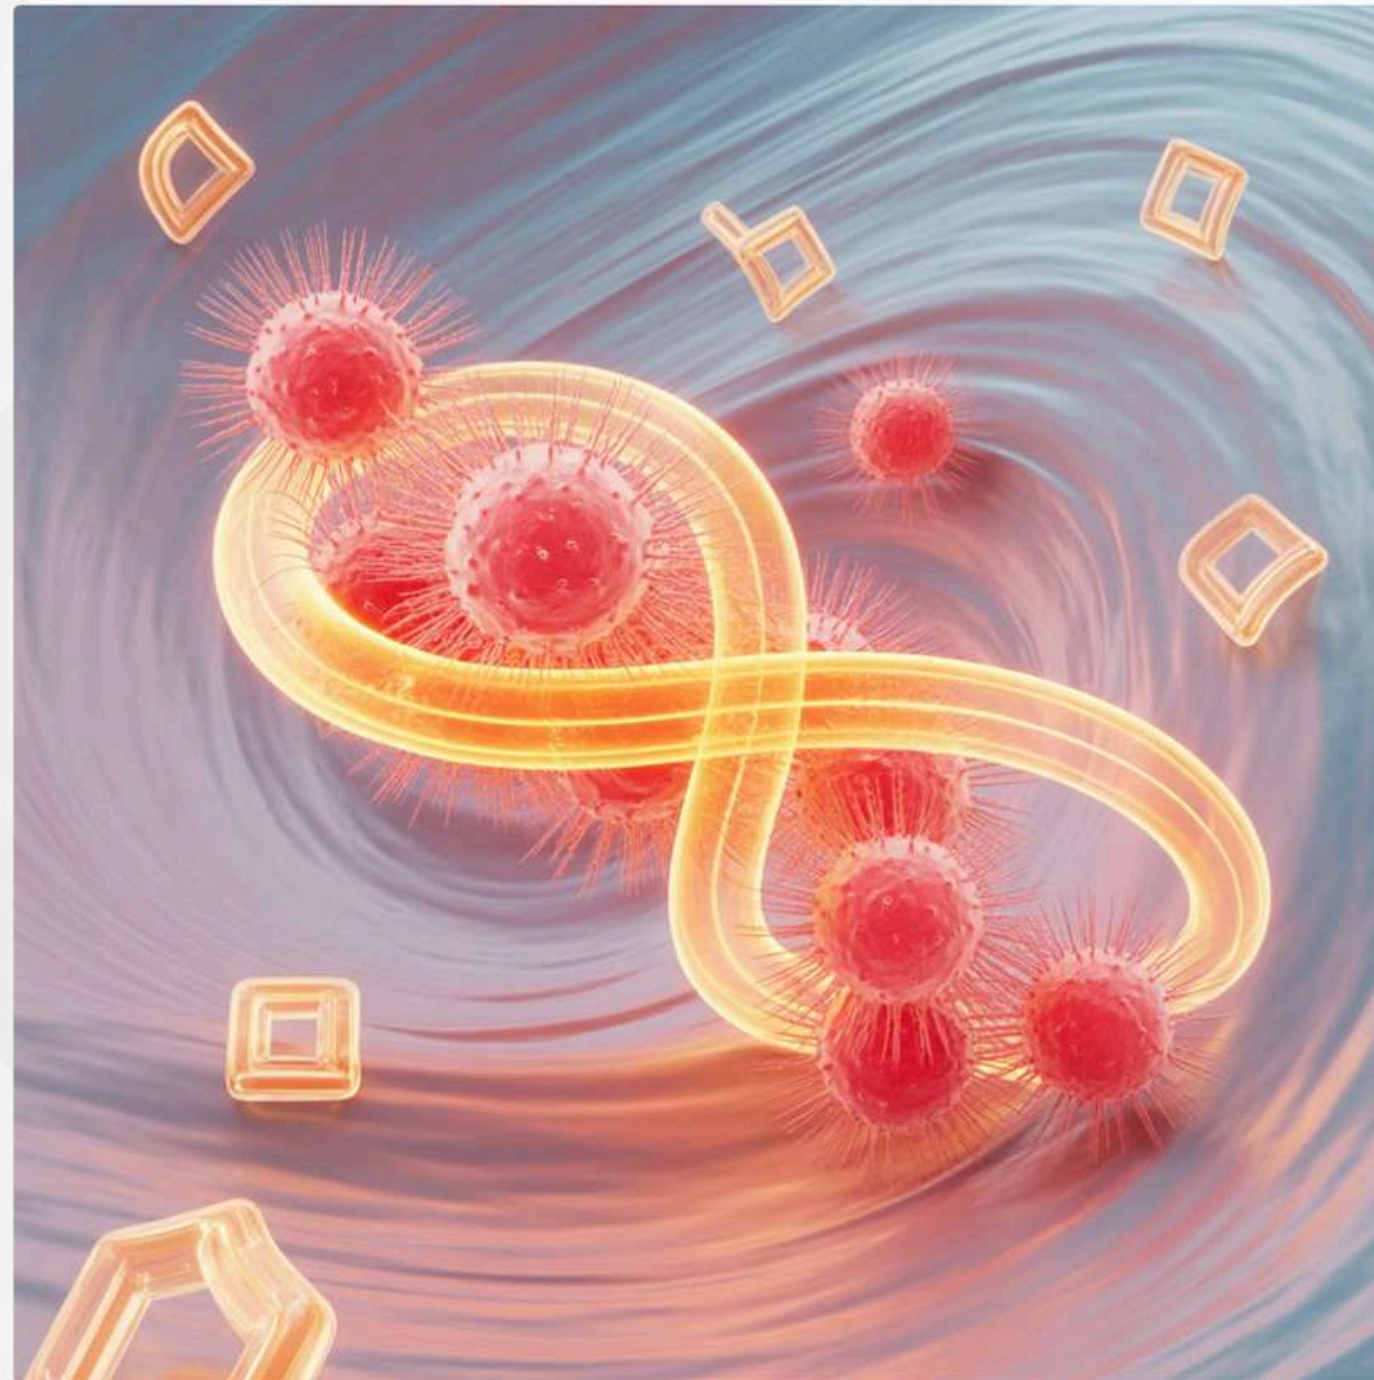

Specially designed for:

Post-surgical ocular infections, inflammatory conditions & acute eye infections

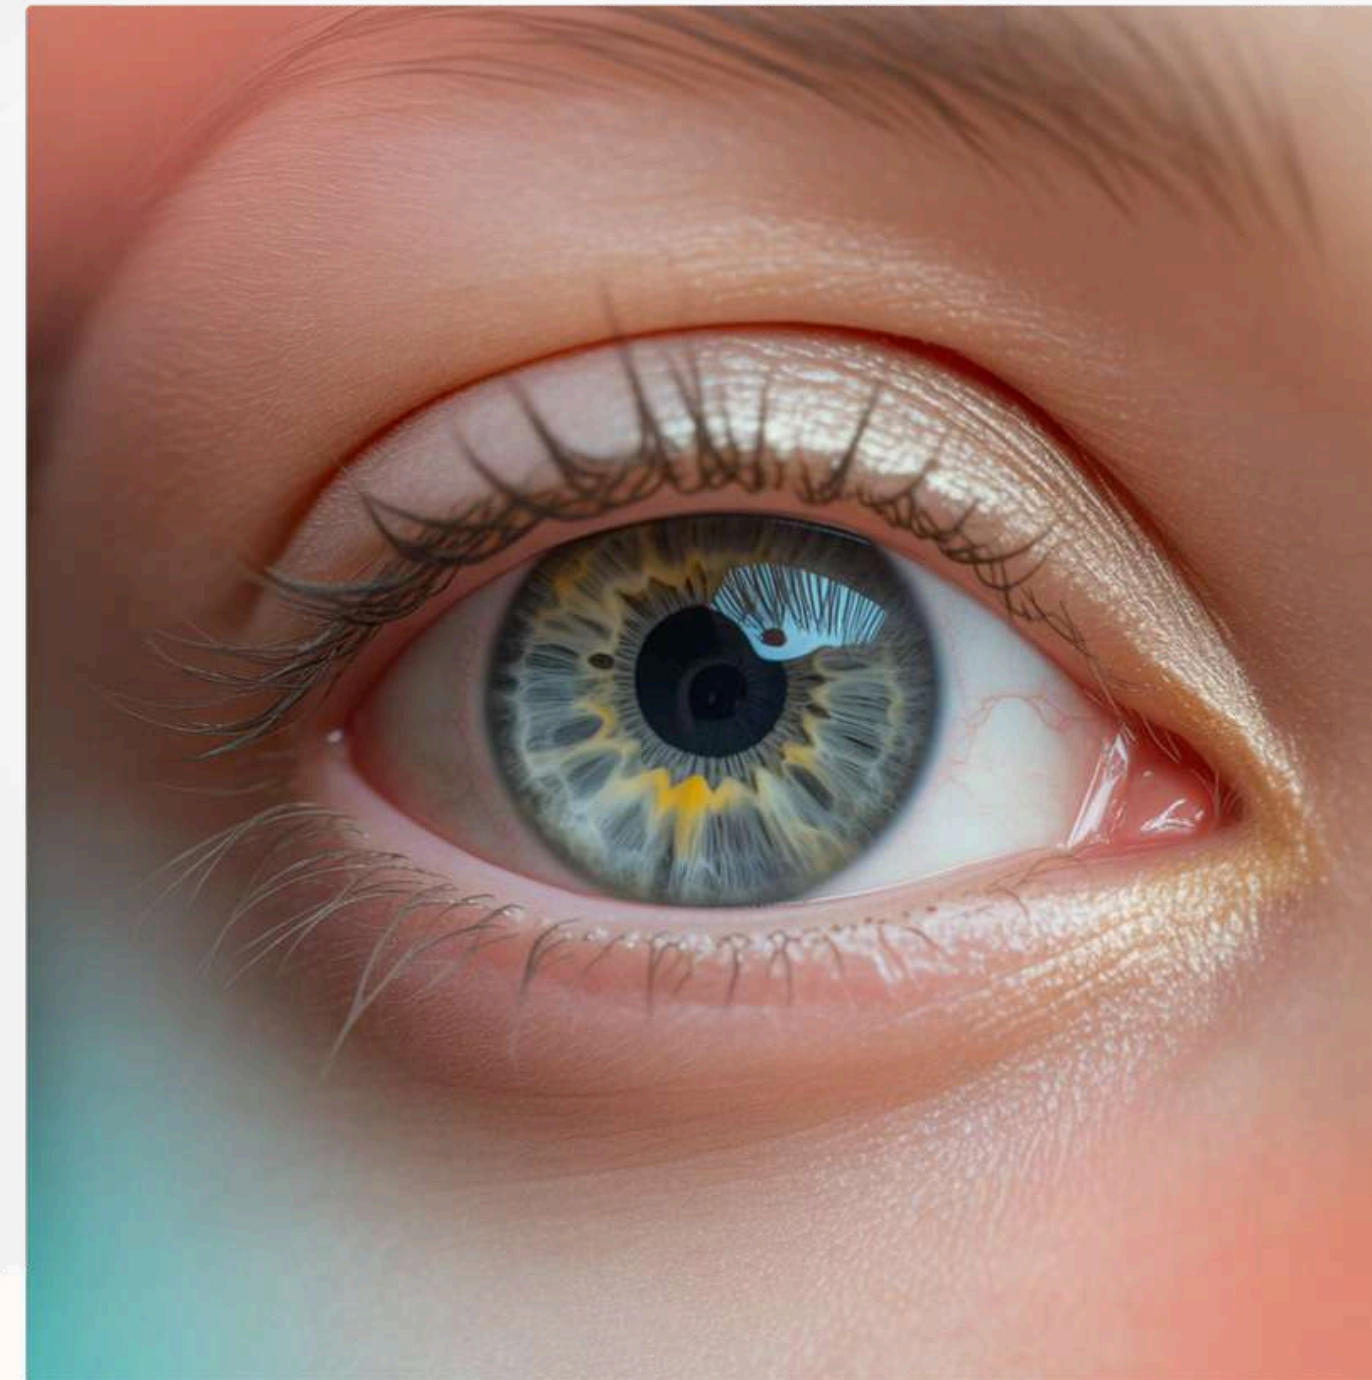

Why Predlot-M?

Dual Mechanism of Action

Moxifloxacin

 Rapid bactericidal effect against gram+ & gram- organisms

Lotepreanol Etabonate

 Reduces swelling, redness, pain & post-surgical inflammation

 **Advantage:** Treats both cause (infection) + symptoms (inflammation) in one solution

Indications

💡 Predlot-M is recommended for:

- Post-cataract & LASIK surgery prophylaxis
- Ocular infections with significant inflammation
- Bacterial conjunctivitis & keratitis
- Steroid-responsive ocular inflammatory conditions

Clinical Advantages

★ Key Benefits of Predlot-M:

Combination therapy

Combination of broad-spectrum antibiotic & safe steroid

Faster resolution

Faster resolution of infection & inflammation

Preventative

Prevents post-operative complications

Patient-friendly

Enhances patient comfort & compliance

Reduced resistance

Reduces risk of antibiotic resistance vs. older fluoroquinolones

Comparison with Other Eye Drops

Parameter	Predlot-M (Moxi + Lotepreanol)	Moxifloxacin Alone	Steroid Alone
Antibacterial	✔ Strong Broad-Spectrum	✔ Strong	⊘ None
Anti-inflammatory	✔ Potent (Lotepreanol)	⊘ None	✔ Strong
Post-op Use	✔ Excellent	⚠ Limited	⚠ Limited
Patient Compliance	✔ Single solution	⚠ Needs additional steroid	⚠ Needs antibiotic cover

Dosage & Administration

Dosage:

1 drop into affected eye(s), **2–3 times daily** or as directed by physician.

Important Warnings:

- Use during post-surgical period as per ophthalmologist's advice.
- Not for prolonged unsupervised use (due to steroid component).
- For **topical ophthalmic use only**.

Safety & Tolerability

🔍 Generally Well-Tolerated

Possible side effects:

- Mild burning/irritation
- Temporary blurred vision
- Steroid-related rise in IOP (rare with lotepreanol)

Contraindications:

- Viral/fungal eye infections
- Hypersensitivity to fluoroquinolones/steroids
- Long-term unsupervised use

Why Prescribe Predlot-M?

 Doctor's Choice For:

Post-surgical management

Post-surgical infection + inflammation management

Combination therapy

Dual action therapy → Antibiotic + Steroid

Safer option

Safer steroid option (lotepreanol vs. prednisolone)

Better compliance

High patient compliance with single bottle therapy
